THE NEW ILLINOIS

We accommodate

1971 EDITION

ILLINOIS

REGIONAL ECONOMIC

DATA

BOOK

In 1970, the Department of Business and Economic Development established a long needed precedent by publishing the first Illinois Regional Economic Data Book, a concise and accurate reflection of the factors that make up Illinois' complex economy. Simultaneously, the book established a second precedent by studying the State's economy on the basis of sixteen distinct economic regions.

Again in 1971, the Department has repeated the Data Book, but this time with expanded and updated information drawn from the latest federal census figures. The facts contained herein are vital to the planning and development of our social and economic programs, and I urge all who are involved in such programs to read and digest the material presented.

Sincerely,

Illinois, situated in the center of the richest and most productive nation in the world, is ideally located for the acquisition of raw materials and the distribution of finished goods. Enhancing the State's appeal as a business site are its own natural resources, its unmatched transportation network, its proximity to major domestic markets and its access to overseas markets. Thus, it has not been by chance that Illinois has become home to over 200,000 manufacturing and non-manufacturing companies.

But, future prosperity cannot be left to chance, and the present Administration of the State of Illinois is constantly studying the State's economy with the ever present goal of raising the economic level of each of its citizens.

We invite investors to use this survey of the Illinois economy to compare our state with any other as a potential business location. We feel Illinois will prove to be the best choice.

Sincerely,

Ray C. Dickerson

INTRODUCTORY NOTE

INTRODUCTORY NOTE

This handbook is a revised edition of a book first prepared and published in 1970 by the Department of Business and Economic Development as a data reference for use by those interested in investing in a business or industrial plant in the State of Illinois. As in the first edition, the State has been divided into sixteen regions, each of which is identified by the name of a principal city within it. Data in the book are presented separately for each region and in summary form for the State.

All of the tables in this book have been updated on the basis of the most recent and suitable data available. Most of the tables have been completely revised and, for some tables, new formats have been prepared to accommodate data not shown in the 1970 edition.

The subjects for which data are presented in this book, along with notes and explanations concerning the data, are given below. In the tables shown, details may not add up to totals due to rounding. In all cases in a column of a table, hyphens indicate zero, and NA indicates data not available.

KEY ELEMENTS OF THE ECONOMIC BASE

These tables present basic income profiles of the individual regions of the State covering the period 1950 through 1969.

Basic income is income derived largely from sources outside the region -- through the sale of local products and services to the rest of the State, Nation or World (and to visitors who come from these outside areas), or through the location in the region of facilities (such as a university) or the local impact

of programs (such as Social Security) which are funded on a Statewide or Nationwide basis -- and which enables the region to "import" from the rest of the State, Nation or World the many goods and services which it needs but does not produce. Basic income is only a portion of total regional personal income (roughly half, in most regions), but it is significant to planning for investment in a business or industrial plant because, over time, its level is the bellwether of regional economic activity, total income, and (considered within the framework of general birthrate trends) population growth or decline.

Some of the basic income figures in the KEY ELEMENTS OF THE ECONOMIC BASE tables were compiled from United States Government or State of Illinois reports. Others were developed using such reports as bases. It is believed that the six elements used in the tables account for most basic income of significance in the regions of the State -- except in Region 1 (Chicago). In this Region, other elements (large business headquarters operations, for example) account for a significant portion, probably as much as twenty percent of the total. Also, in this Region a significant portion of some of the elements shown in the table for the Region (such as manufacturing payrolls) is probably attributable to local, rather than outside, consumption. The Region 1 profile should, therefore, be viewed with consideration for the large market and complex economy which the Region represents.

It should be noted that the basic income figures in the tables are based mainly on data reported by "place of work" rather than by "place of residence," thus portions of this income are apt to be supporting some economic activity (and population) outside the region (as in the case of the Rock Island Region). In other cases, a region located near another which has a large urban center is apt to experience economic (and population) growth attributable to the basic income

growth of the large urban center (as in the case of the East St. Louis Region).

The figures shown for transfer payments in the KEY ELEMENTS tables (and in the PERSONAL INCOME tables) in this book are those now made available as a component of total personal income by the U. S. Department of Commerce, Office of Business Economics. They are generally higher than those compiled for use in the previous edition of this book because of the availability, to the Commerce Department, of more complete data.

POPULATION

In the population tables, the figures shown for 1950 and 1960 are those reported in the United States Decennial Censuses of those years. The 1970 figures given are preliminary figures reported from the 1970 Census. The components-of-change figures for the period 1960-1970 have been computed from the preliminary 1970 Census data and from vital statistics for the period compiled by the Illinois Department of Public Health.

The projected (to 1980) population figures shown represent revisions of the projections developed by the Department of Business and Economic Development and presented in the previous edition of this book. The revisions made were based on trends revealed in the preliminary reports of the 1970 Census. Data for some cities not listed in the previous edition are presented in this book where such cities were reported to have 10,000 or more population in 1970.

PERSONAL INCOME

The personal income tables shown in this book are different from those presented in the previous edition. The United States Department of Commerce, Office of Business Economics, has recently prepared estimates of personal income,

by type, and by industrial source of earnings, for all Standard Metropolitan Statistical Areas and for non-SMSA counties. These data have been aggregated to regional totals for presentation in the book. They are considered useful not only because of the detail they provide, but also because they can be presented to cover an extended time period (through 1968).

Total personal income is the current income (for the year given) of persons in an area from all sources. It is measured before deduction of income and other personal taxes, but after deduction of personal contributions to Social Security, government retirement, and other social insurance programs. It includes income received from business, Federal and State and local governments, households and institutions, and foreign countries. It consists of wages and salaries (in cash and in kind and including tips and bonuses as well as contractual compensation), various types of supplementary earnings termed "other" labor income (the largest item being employer contributions to private pensions and welfare funds), and the net incomes of owners of unincorporated businesses (farm and nonfarm), including the incomes of independent professionals, net rental income, dividends, interest, and government and business transfer payments (consisting in general of disbursements to persons for which no services are rendered currently, such as unemployment benefits, Social Security payments, and welfare and relief payments). The measurement of labor and entrepreneurial income is by place of work (rather than by place of residence). Property income and transfer payments are measured by place of residence. The personal income figures shown for the Rock Island and East St. Louis Regions, particularly, should be viewed with consideration for these measurement criteria.

MANUFACTURING PLANTS

The source of manufacturing plant data shown in this book is County Business Patterns, United States Department of Commerce. The data are not as complete in detail as in the 1963 Census of Manufactures (used as the source of data in the previous edition). However, since detailed data from the 1967 Census of Manufactures is still not available, CBP data has been used to provide relatively current, and at the same time comparable, information.

WATER RESOURCES AND MINERAL AND AGRICULTURAL PRODUCTION

The water resource and withdrawal figures presented are based on estimates prepared by the Illinois Water Survey, Illinois Department of Registration and Education. No major change in these data has occurred since the publication of the previous edition of this book.

Mineral production figures shown have been compiled from Minerals Yearbook, 1968, United States Department of the Interior, Bureau of Mines.

The Agricultural production figures shown have been reproduced from Illinois Agricultural Statistics, Annual Summary, 1970, prepared by the Illinois Cooperative Crop Reporting Service.

SELECTED EMPLOYMENT AND WAGE DATA

These data were compiled from Employment and Annual Payrolls of Firms Covered by the Illinois Unemployment Compensation Act, by Industry and County, issued by the Illinois Department of Labor, Bureau of Employment Security. The figures shown do not include some employment (and wages) unallocated by county.

TRANSPORTATION

These data were compiled from the files of the Department of Business and Economic Development, and from various published and unpublished materials including Illinois Complete Highway Plan, 1970-1990. Illinois Highway Study Commission; Illinois Airport Directory, 1970-1971, Illinois Department of Aeronautics; and A Study of River Ports and Terminals, Transportation Institute of Southern Illinois University, 1967-1968. The Interstate and Other Proposed Freeways map, page v, represents the general plan for highway construction endorsed by the State Administration.

The transportation tables shown represent an updating of data shown in the previous edition of this book. The freeways map and data have not changed since the earlier edition, and it should be noted that the river port and terminal data do not reflect any changes which have occurred since the publication of the study cited.

In the transportation tables, abbreviations are used to designate airlines, railroads and barge companies, and codes are used to designate the general types of commodities which can be handled by terminals at river ports. The keys to the abbreviations and codes are given below.

COMMUNITY FACILITIES AND SERVICES

Data on primary and secondary education were compiled (and updated) from published and unpublished materials prepared by the Office of the Illinois Superintendent of Public Instruction, including Fall Pupil Enrollment and Teacher Statistics, Illinois Public Schools (and Independent, Parochial and Private Schools), 1968-1969, and data on per-pupil operating expenditures (unpublished). Average daily attendance, rather than enrollment, has been used in the tabulations. Higher Education data were compiled from several sources including Enrollment in Institutions of Higher Learning in Illinois, 1969, Bureau of Institutional Research, University of Illinois.

Data on medical services were compiled from Distribution of Physicians, Hospitals and Hospital Beds in the U. S., 1968, American Medical Association, and Directory of Health Care Facilities and Approved Schools of Nursing, 1969, Illinois Department of Public Health. Police and firemen data were updated (from the previous edition of this book) through the Local Law Enforcement Officers Census, State of Illinois, conducted by the Illinois State Police in cooperation with the Illinois Local Government Law Enforcement Officers Training Board, January, 1970, and with information compiled (1969) and supplied by the Illinois Municipal League. The earlier edition of this book presented firemen data on a "full time equivalent" basis. The data shown herein are only for salaried, full-time personnel reported.

HOUSING PERMITS IN PRINCIPAL CITIES

The data on authorized residential building permits, and average values of units authorized (available for a few cities), were updated from Construction Reports -- Housing Authorized by Building Permits and Public Contracts, United States Department of Commerce.

The value of single and multiple units is probably underreported by an average of 10 percent, according to local and national agencies which collect housing permits and value data. This percentage excludes fees for architectural and engineering services, and may vary substantially among the reporting units.

SELECTED ITEMS OF MUNICIPAL FINANCES

In the previous edition of this book, local finance data were aggregated to county and regional levels. The data shown herein are for selected, individual municipalities, and are from Statewide Summary of Municipal Finance in Illinois (for the fiscal years ended in 1968), Illinois Auditor of Public Accounts. Population data used to compute per capita figures were the preliminary 1970 census counts reported.

ILLINOIS EXPORTS

Sources for the export data are Survey of the Origin of Exports of Manufacturing Establishments in (1966 and) 1969, United States Department of Commerce, and Foreign Agricultural Trade of the United States (1966 and 1970), United States Department of Agriculture. Summary data are shown only for the State as a whole. Data on a regional basis are not available.

Note: The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

Note: The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

Note: The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

Note: The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

REGION 13 - WATER RESOURCES AND MINERAL AND AGRICULTURAL PRODUCTION

Water Resources, 1970

Estimated ground and surface water supplies--safe yield, million gallons daily (mgd).	91,283*
Estimated average daily withdrawal (mgd).	285
Indicated water surplus (mgd)	90,998

Mineral Production, 1968

Minerals produced in order of value (with quantities shown where available):

Calhoun County--stone
 Greene County--stone (290,000 short tons), clays
 Jersey County--stone
 Macoupin County--coal (291,000 short tons), stone, petroleum (6,000 barrels)
 Montgomery County--coal (3,099,000 short tons), stone (893,000 short tons), petroleum (1,000 barrels)
 Madison County--stone, petroleum (180,000 barrels), sand and gravel
 Bond County--sand and gravel (440,000 short tons), petroleum (82,000 barrels), clays
 St. Clair County--coal (7,112,000 short tons), stone (2,907,000 short tons), sand and gravel, clays
 Clinton County--petroleum (932,000 barrels), stone, sand and gravel (6,000 short tons)
 Monroe County--stone
 Washington County--petroleum (615,000 barrels), stone, coal (28,000 short tons), sand and gravel (1,000 short tons)
 Randolph County--coal (2,653,000 short tons), stone (1,198,000 short tons), petroleum (121,000 barrels), sand and gravel

Agricultural Production, 1969

Crop production (bushels):

Corn (for grain)	62,894,600
Soybeans (for beans)	23,944,800
Wheat	12,447,500
Oats	658,600

Livestock inventory (no. head on farms):

All cattle	368,800
Milk cows (two years old and over)	61,300
Beef cows (two years old and over)	85,300
Hogs	808,300
Stock sheep	25,700

REGION 13 - WATER RESOURCES AND MINERAL AND AGRICULTURAL PRODUCTION (cont'd)

Milk production (thous. of lbs.) 529,500

Egg production (thous. of eggs). 297,721

*Federal reservoirs under construction (1967) not included as supplies.

In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

Note: The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.

Note: The data shown above are based on county tabulations. In the county tabulations, figures were not published for individual industries in any county in which the industry did not have at least 100 employees or 10 reporting units. However, data for an unpublished industry were included in the total shown for one of the broader industry groups of which it is a part. Also, data for some reporting units which could not be classified by detailed kind-of-business were included in the tabulation in a broader kind-of-business.
